DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3/17/04 has been entered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 12-14, 18, 21, 23, 24, 25, 29, and 31-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 28 of U.S. Patent No. 6,305,382 ('382). Although the conflicting claims are not identical, they are not patentably distinct from each other because the '382 patent

Art Unit: 1731

claims a smoking article having applicant's claimed smoking material and wrapping paper composition; one would reasonably conclude that Applicant's and the '382 smoking article would thus inherently deliver the same CO and CO to tar ratio in view that they both use the same materials to form a smoking article.

Additionally, in regards to the claimed control additives of claims 32 and 34, the '382 patent teaches of providing control additives to the wrapper, see claim 8 of '382.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference A in PTO-892 has been cited to show the state of the art.
